

Part 3

The Project

Epistemological structure

Network / Organization

Strategy
(WSP as MPR)

Call for sponsors

The Project

Our culture has almost lost the wisdom eye.

The Wisdom Science Project is designed to open this eye again.

How will it work?

*Wisdom Science will be a research network on the Internet,
Based on an institute and a small organisation,
With periodical meetings and publications,
Wisdom Science will be an independent, international movement, financed by private and
government sponsoring.*

Wisdom Science Project is a new branch of science.

It is designed to gradually grow out of the existing structures, creating an alternative way to interpret reality.

It will show four levels:

- Level A Basic concepts
- Level B Body of theories
- Level C Interpretation (of level D)
- Level D Sources

<i>Structure</i>
<i>Scientific research</i>

Scientific research

*Wisdom Science Project is not a dogmatic belief system,
it is a science.*

Science

Wisdom Science Project is a new branch of science.

Although it is operating with new concepts, the process of research is very similar to classical science:

New theses and theories are created, fitting into the general view.
Then these theses are tested by comparing them to precise observations of reality.
Until these theses are shown to be wrong, they remain in place.

So research means the creation of and the attempt to test and falsify new theories.

If many theories show to be wrong, the whole approach, the whole paradigm has to be adjusted or given up.

Absolute truth

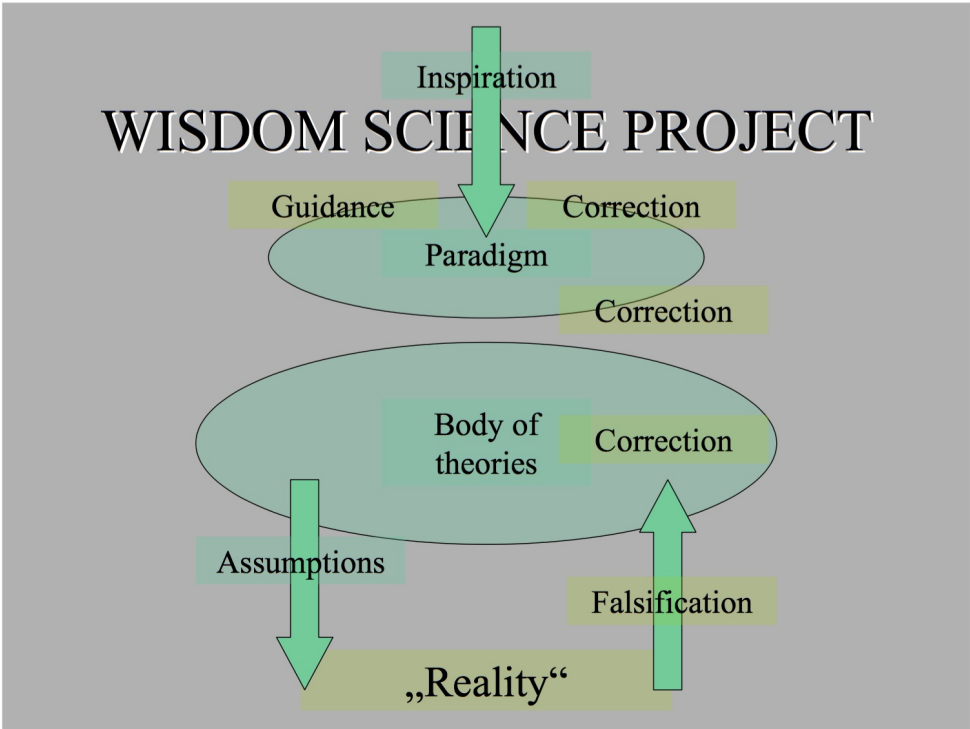

Wisdom Science does not claim to process the truth.

It offers insights and explanations, sometimes weak explanations, in a field, where up to now dogmatic belief systems or superstition has been dominating.

A weak explanation, that can be tested and further developed, is much better than no explanation at all.

<i>Structure</i>
<i>Scientific research</i>

Process of scientific research

<i>Structure</i>
<i>Levels</i>

Level A: basic concepts

The highest level of Wisdom Science contains the basic concepts and the overall view towards reality of the new paradigm.
 The concepts are centred around the new view of the creative process.
 These concepts are:
 stream of life and creative impulse, union of opposites, MPR and distortion.
 Further concepts on this level are: rhythm, phases of growth, hierarchical levels etc.

Level B: basic theories

The basic theories are the application of the Wisdom Science view to the development of the universe.
 At present six fields have been developed.
 These fields are:
 the human body, the human mind, the human family system, history of mankind, religion and the universal view.

The theories in this fields are presented in three aspects:

- Generally speaking** this aspect shows the application of the Wisdom Science view to the topic.
- The problem** this aspect shows the effects of distortion in the respective field.
- The solution** this aspect shows the principles, how the identified problems can be overcome.

All these theories can in principle be tested.
 For instance, if the problem is correctly identified, and the remedy is applied, but the MPR shows no signs of healing, then something is wrong with the theories.

Level C: interpretation

This level contains the interpretation of the sources (level D) in terms of Wisdom Science.
 This interpretation is necessary, to apply the high level and abstract theories of level B to the phenomena of the everyday world.

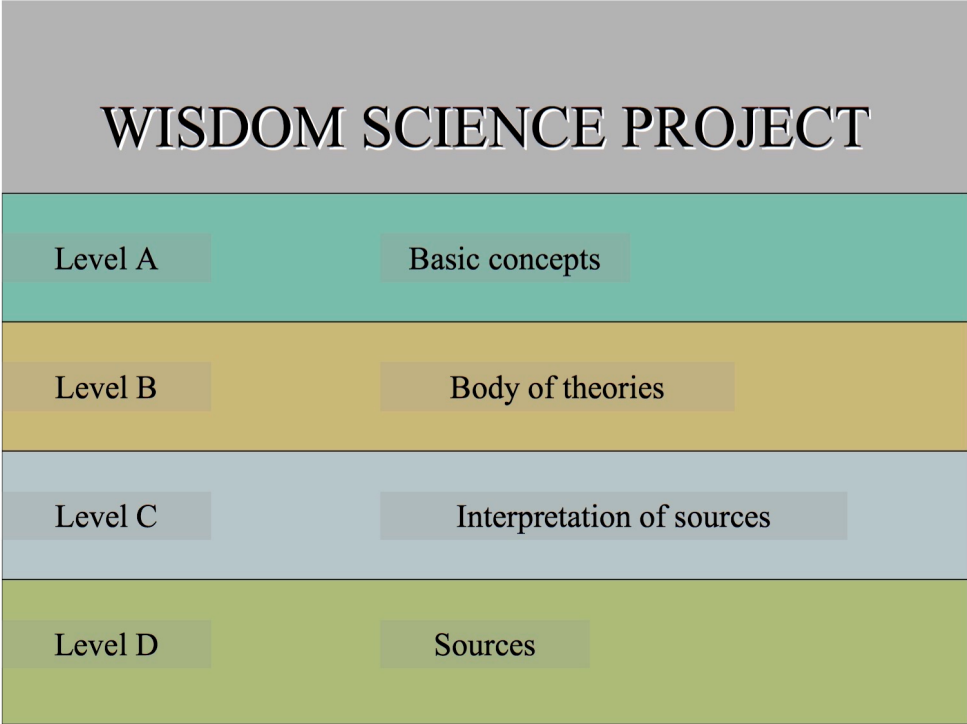

Level D: sources

This level contains all kinds of sources for Wisdom Science. The sources may be existing knowledge from classical science, texts, works of art like paintings and icons, events etc. etc.

In the beginning an important part of the work of Wisdom Science Project will be the selection of sources. Only in very rare cases Wisdom Science Project will have to carry out new research.

<i>Structure</i>
<i>Levels</i>

Levels of WSP

*Wisdom Science Project will be a network
of persons and institutions*

*applying the view and the basic concepts of Wisdom Science
to their respective field of work.*

The core of the system

will be

a homepage on the Internet

containing level A (basic concepts) and level B (body of theories)

and

a small institute,

organising the different fields of research and keeping the homepage up-to-date.

<i>Organisation</i>
<i>Network</i>

Network

Wisdom Science Project is not meant to be a big institution or a dogmatic belief system. It is meant as a movement of thought, connecting different individuals and helping them to coordinate their respective work in a meaningful way. It is meant to enhance productivity and to inspire innovations. In such a way it tries to develop an alternative to the mechanism of market economy as a guiding-line of research.

Every person and every institution can get easy access to the Wisdom Science Project through a homepage on the Internet.

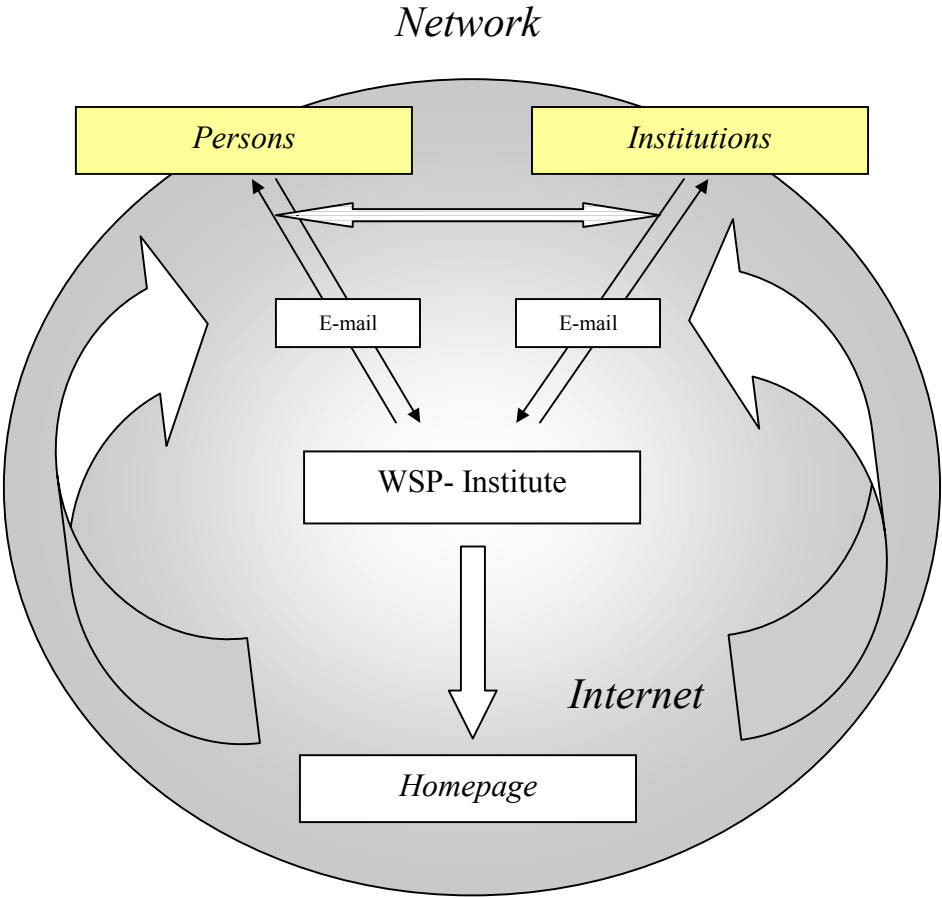

If the approach is found to be fruitful and inspiring for the individual work, contact to the organisation can be made by e-mail.

In this way more detailed information about the specific topic or field of research can be exchanged. So a collective alternative view on the specific topic or problem can be developed.

This is the opening of the second eye, the Wisdom eye to enhance the view of society.

Network of WSP

<i>Organisation</i>
<i>Institute</i>

Organisation

The centre of the network will be a small organisation, coordinating the different activities individual activities, keeping the homepage up-to-date and answering e-mails. Part of the organisation's work will be the application of the Wisdom Science view to specific problems of research or of personal life.

Counselling

In this way the organisation will not only keep the network running, but will also be able to carry out private and institutional counselling, by applying the theories of Wisdom Science to specific problems.

Private counselling will be very similar to psychotherapy. Actually, the theories of Wisdom Science can create an excellent theoretical base for most of the existing schools of psychotherapy.

As the theories of Wisdom Science can also deal with bigger MPRs like societies or groups of nations, Wisdom Science can become an important tool to counsel institutions like governments or the United Nations in dealing with subtle problems of human development.

Teaching

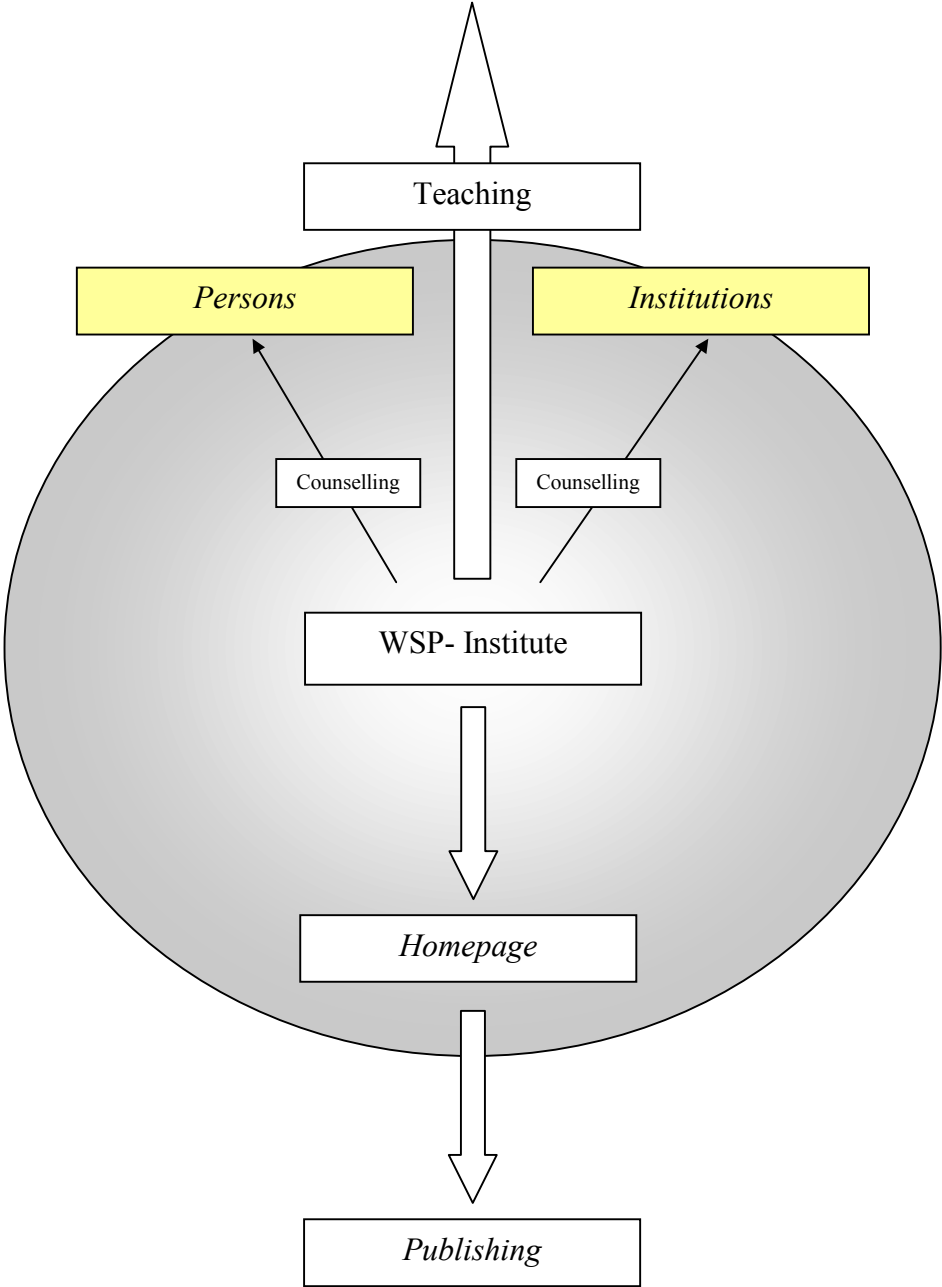

Another task of the organisation will be the publishing and the presentation of the basic theories of Wisdom Science to the public. This may be carried out through printing the Internet pages in a book, and by organising speeches and presentations at universities and other appropriate places.

The actual organisation

Wisdom Science Project will run a small institute, at present a little farmhouse in the Austrian Alps, have a small number of full-time workers and the legal shape of a non-profit organisation. There will be a meeting once a year at the institute to review the work of the past year and to edit the current state of the basic theories.

The Institute

*Wisdom Science Project is a tool
for the development of the mind world.*

*If the mind world is distorted,
this tool will enhance the self healing power and overcome distortion.*

During the healing process obstacles will arise.

The development of the mind world is the main contribution of the western world to the union of mankind.

This development is facing a deep crisis at present.

Wisdom Science Project is designed to help to overcome this crisis by creating a tool to enhance the growth process of the modern mind world.

This tool is transmitting the creative impulse to individual persons, giving them guidance and inspiration.

Strategy

Generally speaking

Generally speaking

*Wisdom Science Project is transmitting the creative impulse
on the level of the mind world.*

Generally speaking Wisdom Science Project is a tool of the mind world. It is supposed to reach man on the level of his everyday consciousness, trying to guide and coordinate his activities in a meaningful way.

Truth, openness and compassion are the qualities of the creative impulse on the level of the mind world. Openness means freedom.

Two ways of thinking

A major activity on the level of the mind world is the process of thinking. There are two basically different types of thinking.

Linear thinking, computing

The first type of thinking remains on the level of complexity where it has started. This is the process of computing information. In everyday life this type of thinking is usually sufficient. It is the application of learned skills to the usual situations.

The problem is, that this type of thinking can easily lead to exaggeration, because it will try to repeat a principle that once has been successful over and over again.

As our planet is limited, this approach will sooner or later reach the limits. If the process of thinking is not changed at this point, exaggeration will follow.

Dialectical thinking

The second type of thinking is the dialectical process. In this process the ideas are growing from level to level through creative unions. In this way also the private MPR, the personality of the thinker is growing.

This type of thinking is able to overcome limits on a higher level and contribute to the development of mankind.

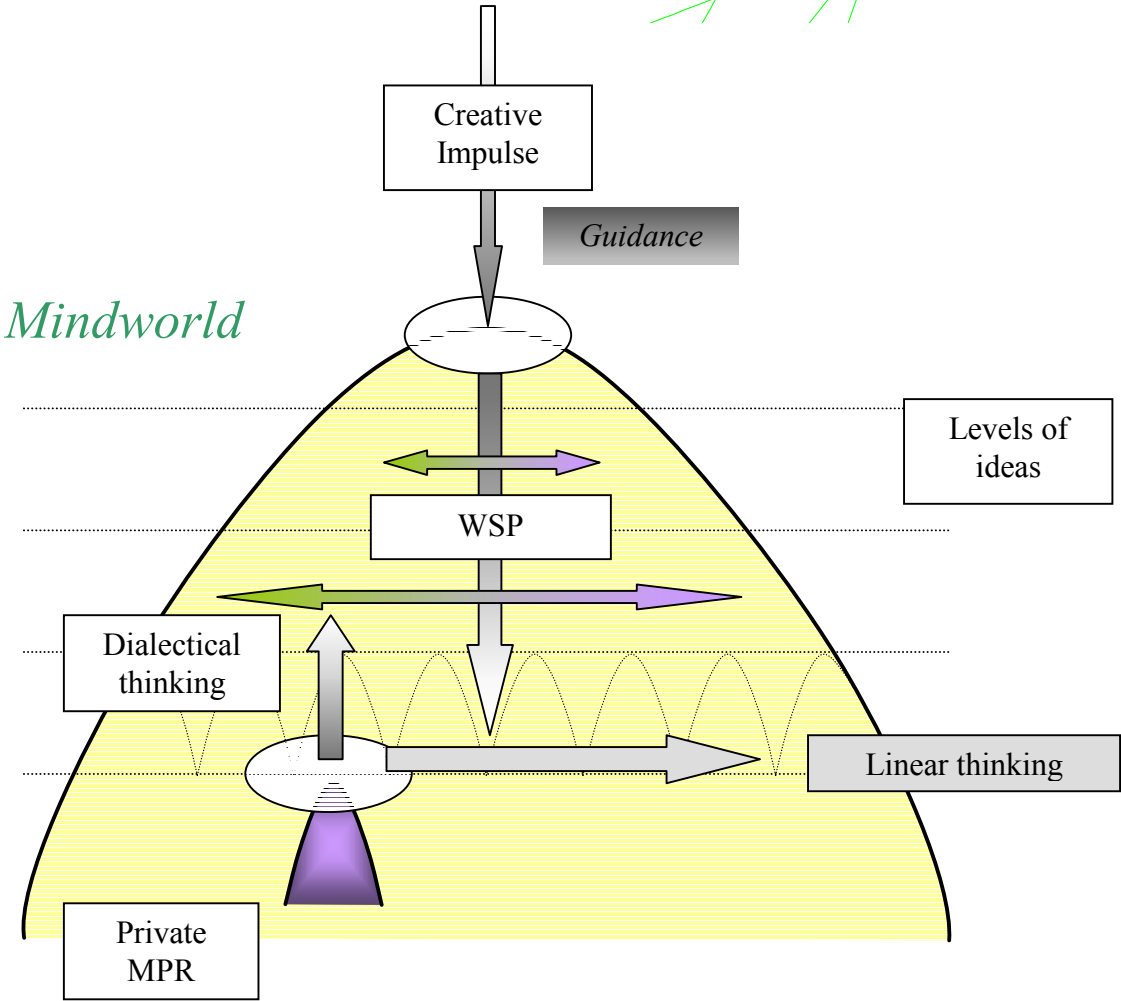

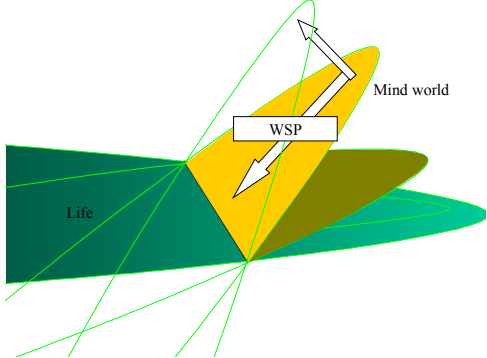

Dialectical thinking requires a connection to the creative impulse. In a distorted mind world dialectical thinking will become very rare and limited to single individuals. Their thinking will not be recognised or favoured by the society.

Wisdom Science Project will be a tool to support dialectical thinking and thereby overcome the distortion of the specific mind world.

In this way the whole community will get an impulse to grow again.

<i>Strategy</i>
<i>Generally speaking</i>

Wisdom Science Project in a mind world

<i>Strategy</i>
<i>The problem</i>

The problem

*If the mind world is distorted,
Wisdom Science will be treated as a concurrence.*

If the society is dominated by distorted union, the work of Wisdom Science will meet resistance.

The Oedipus constellation will appear, trying to destroy the ideas inspired by a genuine creative impulse.

There are different ways, how this tendency may manifest. It may manifest in open hostility towards the Project, it may manifest in irrational feelings and doubts, it may manifest in jealousy of the existing institutions etc..

One major problem will be the steeling and the distortion of specific aspects of the Wisdom Science Project.

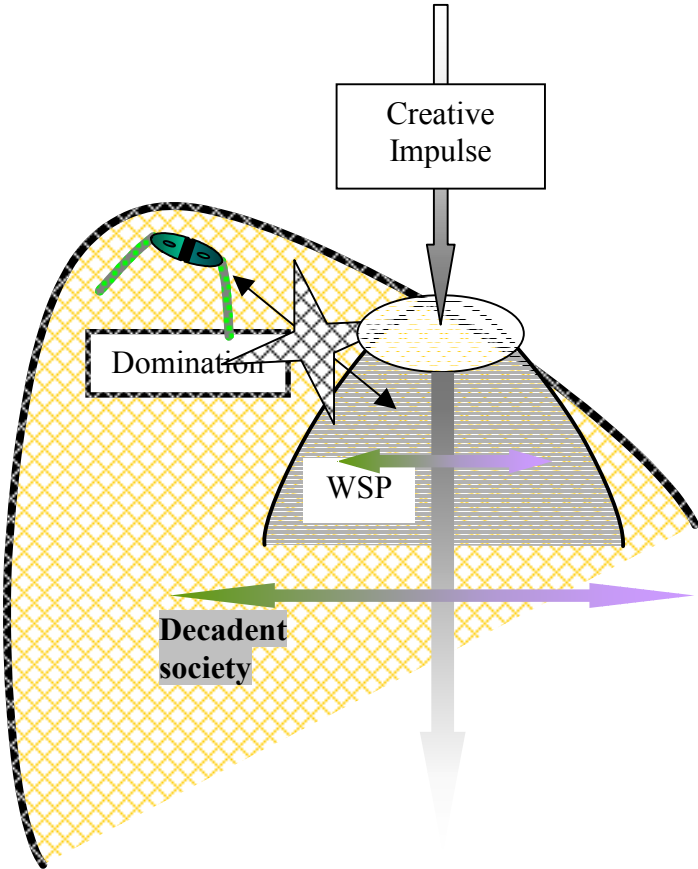

If the Project cannot be stopped completely, one will try to create fake networks or movements, be it to make money with the ideas, be it out of other reasons.

Wisdom Science will have to face these problems and overcome them one by one.

<i>Strategy</i>
<i>The problem</i>

Oedipus constellation

opposing WSP

<i>Strategy</i>
<i>Opposing arguments</i>

Standard objections

Classical arguments against Wisdom Science Project

Argument number one

It's not true

Standard answer

In order to judge the truth or the mistakes of Wisdom Science, one needs to have a more inclusive and more accurate philosophical system to explain reality.

If such a system cannot be presented, criticism of Wisdom Science is unbased and therefore can be refuted.

Argument number two

*Wisdom Science contains nothing new,
so it is not needed.*

Standard answer

It is true, that most of the details that are explained by Wisdom Science are known already. However, the real big new thing is the capacity to draw connecting lines between all those different phenomena.

In short, Wisdom Science is not adding more details to the knowledge of mankind, but it opens up a general view which is badly needed.

If such a general view, equalling or surpassing Wisdom Science, cannot be produced, also this argument can be rejected.

<i>Strategy</i>
<i>The solution</i>

The solution

*Once the mind world will have accepted
the benefits of Wisdom Science,
it will continue to grow and overcome distortion.*

*At that point also the obstacles to the Wisdom Science Project will
slowly disappear.*

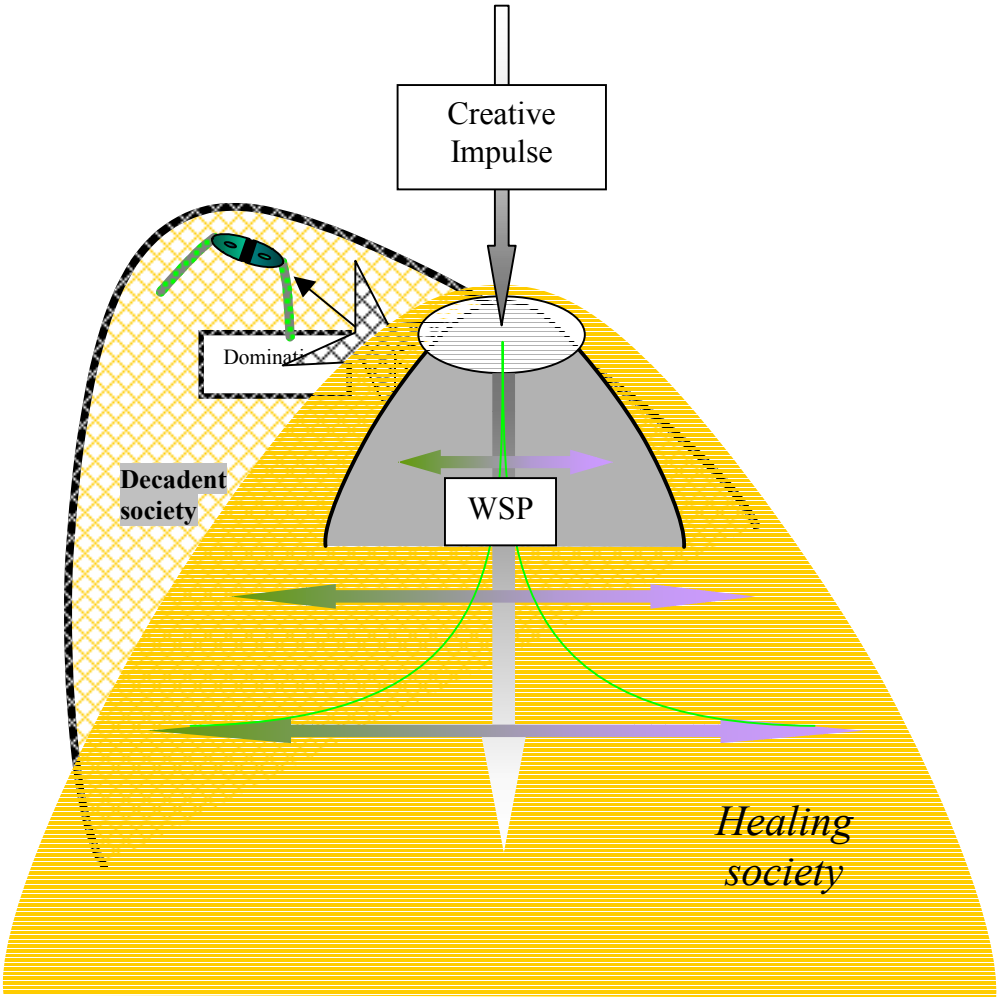

Once the Wisdom Science Project will have become an accepted and fertile movement, the problems of the beginning phase will quickly disappear.

The main thing is, to overcome the distortion on the highest levels of the mind world. Once the healing process is applied on these levels, the rest will come automatically.

As long as Wisdom Science Project is very small, it is also very vulnerable. However, being small, it can remain unrecognised for some time by the opposing forces.

<i>Strategy</i>
<i>The solution</i>

Healing a mind world through WSP

Call for sponsors

money, money, money

*Money is the stream of life
on the level of the mind world.*

*If the project wants to succeed on this level,
it will need reasonable funds.*

Wisdom Science Project is not a backyard comedy for some scientists, it is a necessary investment in the future of mankind.

The project will bear its fruits only after decades of development. So it cannot follow the laws of market economy now. It needs sponsoring.

<i>Sponsoring</i>
<i>Money</i>

Private sponsoring

If Wisdom Science Project wants to follow the creative impulse, it has to be independent. Independence on the level of the mind world means having independent sources of income.

Although selling the books and counselling may be a good source of income for the Project, this will not be sufficient to fulfil the task of healing distorted mind worlds and creating an alternative view towards reality to open the Wisdom eye.

In order to grow to a reasonable size and to do good and professional work, the Project is dependent on the insight and the goodwill of individuals, ready to give money to the Project directly.

This is a call to you!

It will depend on every one of us, whether the Project will succeed or not.

Government sponsoring

Wisdom Science Project is a scientific research programme.

So it would be natural, to get some of the funds, that a country is prepared to pay for scientific research.

In the same way as the prestige of the country is supported by international success in sports, arts or science, the prestige of the country can be raised by developing a successful branch of Wisdom Science.

As an international movement Wisdom Science can also become a unifying force of cultural development.

In this way it could become an important institution or field of activity for organisations like the European Union.

As the scope of Wisdom Science is universal, and it is dealing with historical, political and spiritual developments of mankind on the highest level, it would be very well suited to become a major project of the United Nations.
