**WISDOM SCIENCE PROJECT**

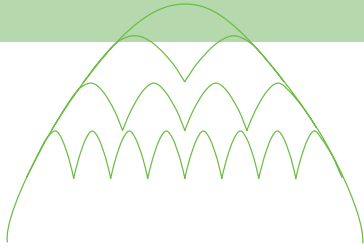

**BASIC CONCEPTS**

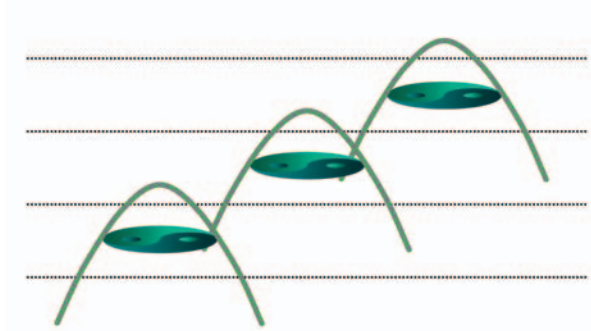

MATTER, SPACE,  
TIME AND ENERGY

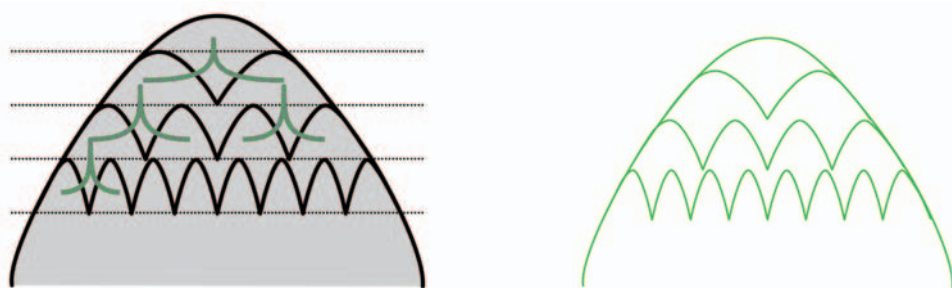

## Hierarchy

The principle of union can be repeated on different levels of complexity.

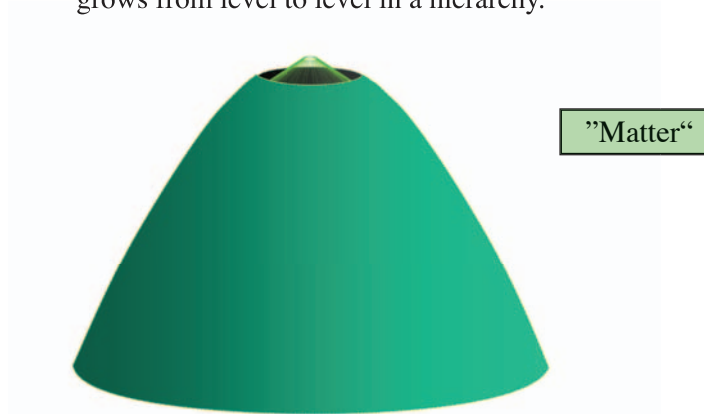

In this way a characteristic pattern of relation is created. As the lower levels comprise more elements than the higher ones, this pattern takes the form of a pyramid or a hierarchy.

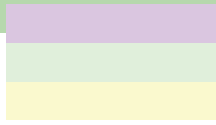

The patterns of relation in a hierarchy follow certain rules. These rules can be expressed in the form of a mathematical matrix. They are similar for all hierarchies in the universe.

The quality of the relation, which is the capacity to unite more and more elements, grows from level to level in a hierarchy.

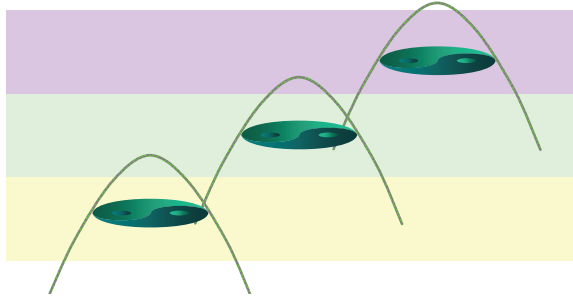

The hierarchies are the atoms and molecules, the fixed structures, and in this way the matter of Wisdom Science.

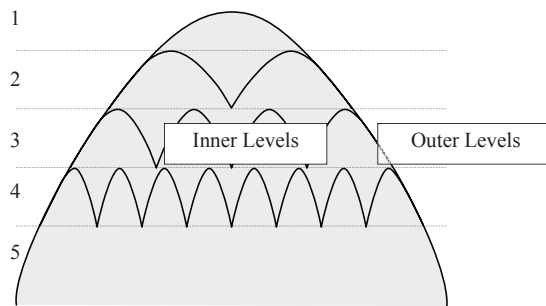

# Level

The repetition of the principle of union creates various levels of complexity in the relation.

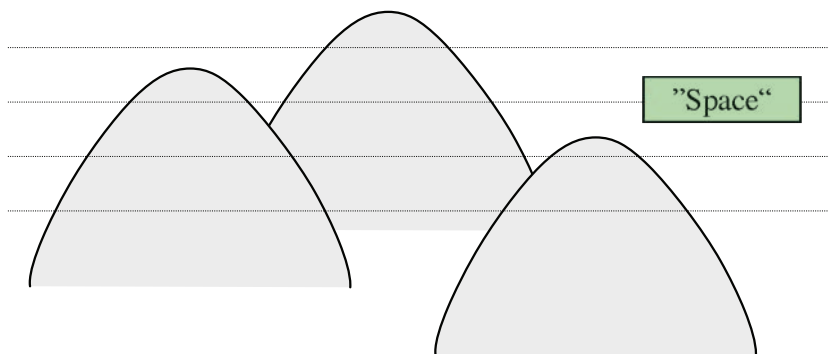

These levels can first be seen within a hierarchy.

When various hierarchies are placed side by side, one can see that their levels correspond.

These may be seen as the outer, objective levels of harmony.

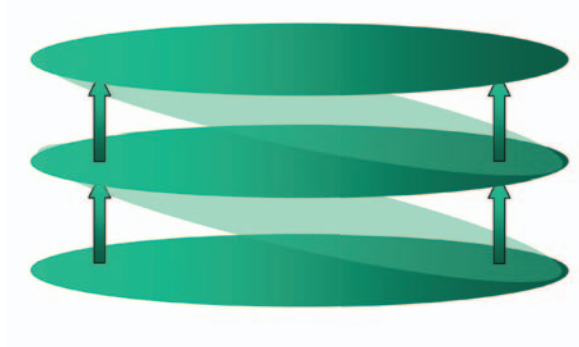

These levels are the space of Wisdom Science.

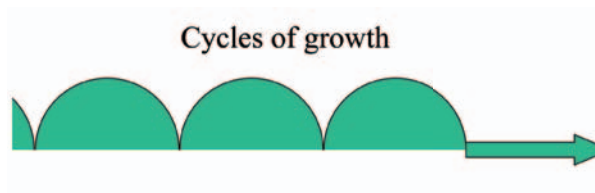

# Rhythm

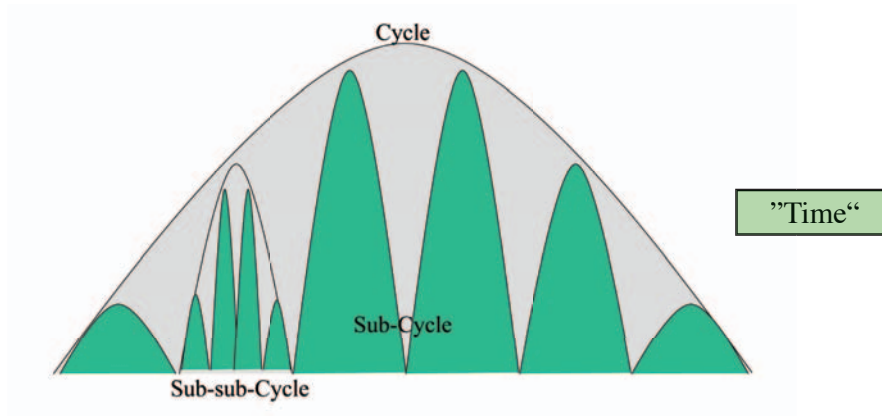

The process of union is a cyclic one, which is constantly repeated, like the coming and going of a wave, like breathing in and out.

Through this repetition the relation develops.

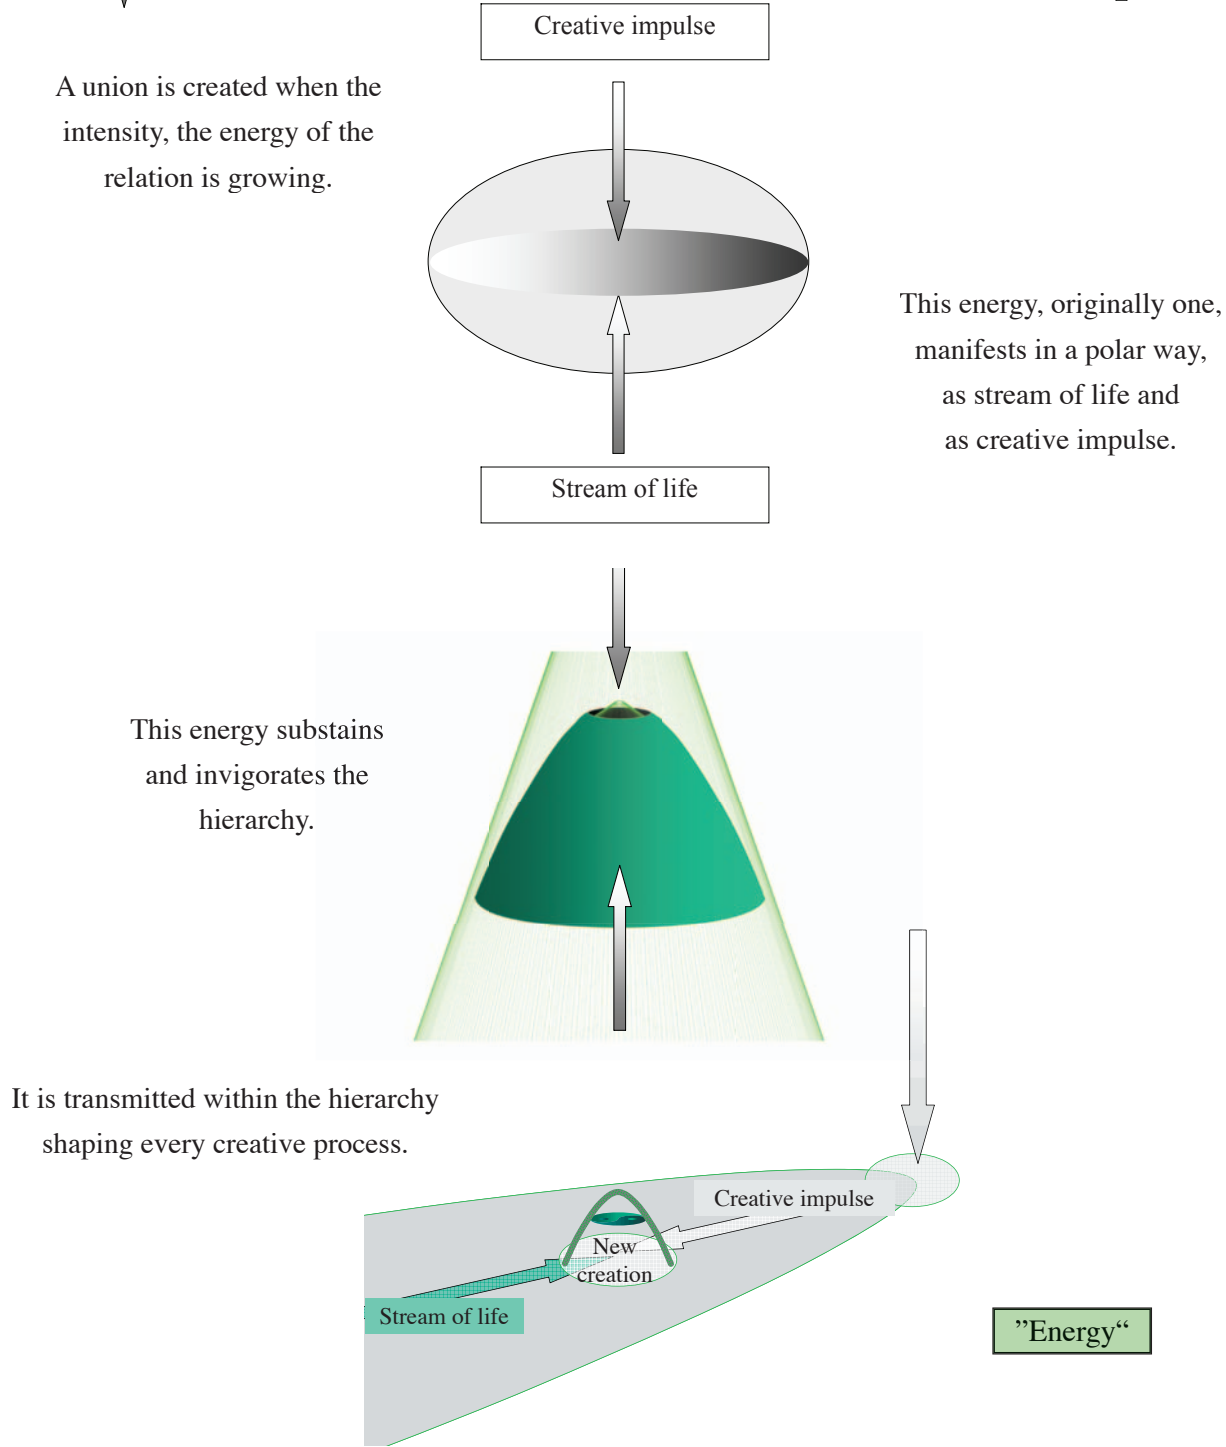

As the higher levels of a hierarchy are based on different unions on lower levels, also the rhythm of a hierarchy is based on different sub rhythms.

The rhythm of these relations is the time of Wisdom Science.

**Creative impulse and stream of life**

Creative impulse and stream of life are the two aspects of the energy of Wisdom Science.
